

Keighley Association of Engineers

Arcade Chambers,
North Street,
Keighley.

Dear Sir,

An Inter-lecture

has been arranged with the Keighley Textile Society and
will take place on

Friday, December 14th, 1934

in the

Queen's Hotel, Keighley

The lecture will be delivered by

F. L. SLEE, B.A., B.Sc., London,

(of Shell-Mex & B.P. Ltd.) on

"Lubricants—The Relation between Laboratory and Engine Tests"

SYNOPSIS :

"A brief description of the common Laboratory tests, as carried out on lubricating oils, such as specific gravity, flash point, viscosity and setting point. The interpretation of these tests will then be dealt with in the light of engine test; thus the correlation between flash point and carbonisation in an internal combustion engine with actual engine test, will be quoted, and also such comparisons as the relationship of viscosity and engine power."

Chair to be taken at 7-30 p.m. by

J. MAURICE HILL, Esq.

President-Elect of the Keighley Textile Society

A good attendance of members of both Societies is desired.

T. MERCER, (Hon. Sec.)
