

Keighley Association of Engineers (2015-16 syllabus)

A visit to Powerrun Project Management Ltd

Date: Wednesday 25th November 2015
Start time: 2.00 p.m.
Location: Address details overleaf

Dear members and guests,

The Keighley Association of Engineers is pleased to announce its second November 2015 event, a visit to Powerrun Project Management Ltd, Beech Mills, South Street, Keighley, West Yorkshire BD21 1AQ Tel 01535 667614

Powerrun has 25-years experience in the design, fabrication, on-site mechanical installation and commissioning of complete process pipe work systems, pump stations, pressure vessels, process tanks and special large-diameter bespoke pipe fittings in both carbon and stainless steel materials.

They also undertake installation of submersible borehole and wet well sewage pumps, dry well and line shaft type pump sets, valves, flow-meters and other water and effluent process treatment plant and associated equipment.

Working from their West Yorkshire based design, project management and fabrication facilities, they offer a single source supply to the privatised water utility companies, AMP framework contractors and other equipment manufacturers.

The company is currently completing a large order in stainless steel so it's a good time to visit.

Please let John Pankhurst know you are going – many thanks.
